-Scientific activity: 1998.-to date

-Fields: Science-History-Sufi

It has 60 brief books in Sufi published only on the World Archives website

-Has scientific ideas about the shape, composition and composition of the universe and about dark matter which is thought to be the first form of water and dark energy is a state of its characteristics and not independent of it

- -

The first to try to prove scientifically that the moon was split in half during the Prophet Muhammad's reign despite the great ridicule and mockery he was subjected to with European and American scientists who sent them and tried to share his thoughts and his idea was about searching for all the historical inscriptions, writings and texts from the contemporary civilizations of that period in Japan, China, India, Iran, Europe and others that codified .this rare astronomical incident

-The first in the Islamic world to be (prayer and - peace on the Prophet Muhammad and his family) an independent Islamic science

He prepares a collection of articles on archaeology in Libya, its history and development, and another on prehistoric monuments in the Green Mountain. He also prepared a list of more than 1,300 Green Mountain scholars and thinkers in eastern Libya

Although he did not appear on the media, his - influence was strong on the pages of the Internet network, not to follow Sufi roads, especially for Arab students in general in all fields, he is the

founder of what he called (Prayer Treasury on the Prophet Muhammad and his family) which continued its activity between 2008-2019 and gathered thousands of prayers on the Prophet Muhammad from all the Sufi roads in the world.. It is one of the largest library of Arab students in which thousands of useful links were made known in the name of The Grand Theoretical Library continued its activity between 2008 and 2018 .before it was fought against religion
